

# Information Security Project

## User Manual

*(To run the application, you must have python3 installed on your machine)*

Here's a quick guide to download and run our application from terminal/command line:

```
git clone https://github.com/francescoPICCOLI/Information-Security-Project.git
```

```
cd Information-Security-Project
```

```
python3 -m venv my_venv
```

```
source ./my_venv/bin/activate
```

```
pip3 install -r ./requirements.txt
```

\*choose the branch you want (**secure-version** or **insecure-version**) with:

```
git checkout <nameOfTheBranch>
```

**Finally run the application with:**

```
python3 app.py
```

## Credentials to login
